Education

George Mason University

Master of Science in Computer Science

GPA: 3.55 / 4.0

Relevant Coursework: Machine Learning, Data Mining, Data Science, Algorithm Design, Statistics & Probability

Aug 2024 – May 2026

Fairfax, VA

Vishwakarma Institute of Technology

Bachelor of Technology in Computer Engineering

GPA: 3.37 / 4.0

Aug 2020 – May 2024

Pune, India

Skills

Languages: Python, Java, JavaScript, TypeScript

Generative AI & LLM Tools Azure OpenAI, LangChain, RAG, Claude API, Cursor, Github CoPilot

Frontend: React.js, Angular, Next.js

Backend: Spring Boot, Django, Flask, Node.js, REST APIs, Kafka

Cloud & DevOps: AWS, Azure, Docker, CI/CD Pipelines, Agile

Databases: PostgreSQL, SQL

Experience

Software Development Intern

Hexagon, India

Aug 2023 – April 2024

Hyderabad, India

- Developed, tested and deployed a production-ready conversational AI assistant using **React**, **Django**, and **Azure OpenAI** with **RAG pipelines** serving **500+ daily queries** with **90%** response accuracy and cutting issue resolution time by **50%**.
- Built and maintained LLM workflow using **LangChain** and **Jenkins CI/CD** deployed on **Azure** across **10+ client organizations** and improving deployment reliability by **40%**.
- Participated in **Agile sprint ceremonies** including code reviews and design reviews, collaborating with cross-function teams to deliver secure, production-ready features on **bi-weekly release cycles**.

Research & Development

AI-Accelerated Software Engineering (DocuMind)

George Mason University — CS 691

Sept 2025 – Dec 2025

[GitHub](#) 

- Designed and enforced automated documentation standards for a **Flask-based AI agent**, authoring detail design documents that reduced developer onboarding time by **30%** across a **1,000+ line codebase**.
- Leveraged **GitHub Copilot** and **Cursor** to accelerate feature iteration by **35%**, establishing structured experimentation and feedback cycles to continuously improve LLM output quality.

Projects

Customer Recommendation System Through Transaction History [\[GitHub\]](#)

Jan 2025 - May 2025

- Built a production data pipeline in **Django/PostgreSQL** processing **22,500+ financial transactions**, training a **stacked regression model** to forecast purchase behavior and deliver personalized recommendations across **150+ customers**.
- Engineered a Random Forest model using behavioral features and integrated **LLM-based message generation** to personalize recommendations, achieving **macro F1 $\approx$ 0.52**.

Experimentation & A/B Testing Framework for Product Decisions [\[GitHub\]](#)

- Designed an end-to-end **A/B testing framework** processing **10,000+ simulated user events**, leveraging **Python** and **ETL pipelines** to generate, clean experiment data across variants and cohorts for data-driven product decisions.
- Implemented **z-tests** and **confidence intervals** using **SciPy** and built logistic regression models to evaluate conversions, achieving **1.5–3.0%** performance improvement across **5+ prompt variants** with integrated **LLM evaluation**.

EventCart – Event-Driven Checkout Microservices [\[GitHub\]](#)

Oct 2025 - Dec 2025

- Designed an event-driven microservices architecture using **Java**, **Spring Boot**, and **Kafka**, orchestrating order, inventory, payment workflows and handling **1,000+ transactions** with **Saga-based** fault tolerance.
- Engineered idempotent event consumers using **Redis caching**, and developed **JUnit/Mockito test suites** with **85% coverage**, preventing **100% duplicate message** execution and reducing read latency by **35%**.

Honors

- Developed CupidLove, a full-stack social matching platform, at GMU HackFax competing among 150+ teams delivering a functional React and Node.js prototype with REST API integration within a 24-hour sprint.
